Advanced Technology for the Financial Market

Amano Time Stamp Delivers OATS Compliant Technology!

Amano's Web Based TS-3000i assures financial institutions' compliance with FINRA OATS Rule 7430. The TS-3000i automatically syncs directly to the National Institute Standards & Technology (NIST) or internal/external NTP time source. The stand-alone, zero configuration time clock runs on its own employing easy-to-use time synchronization schedules with a backup system that sends e-mail notification and SNMP trap alerts. This feature enables network administrators to centrally manage time clock performance, locate problems and solve them in a timely manner.

The TS-3000i generates reports on time sync events for use during an audit, supports Dynamic Host Configuration Protocol (DHCP) and maintains time less than 4/10 of a second over a 24-hour period once synchronized. The time stamp requires no server/desktop software, minimal IT staff involvement and setup is quick and simple to install. Therefore, making this the optimal choice for brokerage firms.

Security Solutions for Brokerage firms and Trading floors.

Preventing security breaches is a primary concern for IT professionals and top executives in the financial service industry. One important issue for IT personnel is the need to secure data centers (where servers reside) to protect employees and client's records (on IT networks). As a result, IT professionals are implementing several layers of physical access control as a means to deter unauthorized personnel from accessing certain areas in the building.

Video Surveillance Monitoring

Amano delivers cutting-edge video surveillance to record and track movements. Using the latest analog or IP camera configurations and digital video recorder solutions, Amano's Digital Video Management Suite (DMVS) provides powerful search tools for rapid incident tracking and excellent megapixel processing. Combined with flexible video analytics, this offers a robust 24-hour video security solution.

### Physical Access Control
• Small Brokerage Firms

Amano's Nexus Lite is the optimal solution for you if you need an easy to operate access control system that manages up to 8 doors. Our simple, yet flexible system provides keyless access using our vandal resistant, patented metal proximity reader technology. The Nexus Lite delivers effective real-time web based access control. This economical system has two unique options - the touch screen version (first of its kind) that provides easy registration and reporting and the web browser that makes system setup simple.

Amano's TS-3000i Web Based Time Clock is perfect for Trading Floors

CCTV and Access Control for Single or Multi-Site Locations

• Mid-size to Large Enterprise Firms

The Nexus 220 model provides security at every location through centralized integration and monitoring. Using vandal resistant patented metal proximity readers, the Nexus 220 can manage up to 128 readers with entry and exit control including all-door lock-down options.

The AmanoNet is our multi-site access control solution utilizing a network able client/server system to manage a single door or global enterprise. This scalable enterprise system seamlessly integrates with Amano's vandal resistant metal readers, cutting-edge cameras and network video recorder systems for hundreds of locations. Thereby, providing a total solution to easily manage through one resource.

Biometrics and Time Solutions driven by your needs.

Biometric Identity Authentification

Biometrics provide greater security when protecting valuable information from hackers. For example: Securing data centers reinforced by biometrics can protect servers, thereby reduce human error, data loss and tampering.

Amano's Biometric Solutions lead the industry with their state-of-the-art fingerprint readers powered by Sagem technology, the leader in fingerprint processing software for U.S. and International Security and Crime processing organizations. Integrated fingerprint scanning provides the highest level of access security and the convenience of keyless entry.

Employee Time Tracking Made Simple

Managing your payroll can be a hassle if you are not equipped with the right time and attendance solution. Amano's Time and Attendance systems deliver easy-to-use employee time tracking solutions to effectively manage your payroll. Amano's suite of applications range from low to high end enterprise software, coupled with a broad range of hardware devices, from badge swipe to biometrics. Our software seamlessly integrates with Amano's access control and most popular payroll applications such as ADP, QuickBooks, Ceridian, Peachtree, Paychex and more.

Amano Dealer Network

Talk with Amano today to identify the nearest Amano Dealer to you. Amano's extensive network of Certified Dealers throughout the USA, Mexico and Latin America provides help with:

• Determining your requirements and providing the most cost effective scale of solutions

• Installing and commissioning your system

• Rapid and experienced support
